

FRONTEND WARS 2026

RULES & ELIGIBILITY

PLEASE READ CAREFULLY

These rules are designed to ensure a fair, transparent, and competitive experience for everyone.

OUR GOAL

Encourage creativity, reward problem solving, and celebrate frontend excellence.

01 ELIGIBILITY

Open to all students and developers.

Individual participation only (No teams).

Participants from any college or organization are welcome.

Cross-college participation is allowed.

A valid **GitHub** account is mandatory.

Every participant must submit all required deliverables before the deadline.

02 TECHNOLOGY REQUIREMENTS

Participants must build their project using the following core technologies:

React

MANDATORY

TypeScript

MANDATORY

Vite

MANDATORY

Tailwind CSS

MANDATORY

IMPORTANT

Participants may use any frontend library or package provided it:

- ✓ Runs entirely in the browser
- ✓ Does not introduce backend functionality
- ✓ Does not rely on server-side rendering
- ✓ Does not use cloud services or databases
- ✓ Does not provide complete application templates

03 ALLOWED FRONTEND LIBRARIES

Participants are free to use any client-side frontend library that enhances their solution.

EXAMPLES INCLUDE (BUT ARE NOT LIMITED TO)

Three.js

Recharts

React Three Fiber

D3.js

GSAP

React Icons

Framer Motion

Lucide React

Lenis

Zustand

Chart.js

shadcn/ui & Radix UI

This is NOT a whitelist.

Any frontend library is allowed unless it violates the competition restrictions.

04 NOT ALLOWED

BACKEND & SERVER TECHNOLOGIES

- ✗ Backend servers
- ✗ Server-side rendering
- ✗ Firebase
- ✗ Supabase
- ✗ Appwrite
- ✗ Any Database (MongoDB, PostgreSQL, MySQL, etc.)

EXTERNAL SERVICES

- ✗ External APIs for dynamic application data
- ✗ Cloud databases
- ✗ Authentication services

UNFAIR COMPETITIVE ADVANTAGES

- ✗ Pre-built application templates
- ✗ Complete AI-generated projects
- ✗ Previously completed projects submitted as new work

Any technology that introduces backend functionality or provides an unfair competitive advantage may lead to **disqualification**.

FRONTEND WARS 2026

RULES & ELIGIBILITY

PAGE 2 OF 2

05 AI TOOLS POLICY

AI-assisted coding is allowed.

Tools like ChatGPT, Claude, Copilot, Antigravity, etc. may be used to write code, debug, and speed up your work as you would in a real job.

AI-generated complete submissions are not allowed.

A project that is substantially AI-generated as a whole, rather than AI-assisted, will be disqualified.

Bypassing rules using AI is not allowed.

Using AI to bypass the technology requirements (e.g., scaffolding a disallowed framework and disguising it) will lead to disqualification.

06 SUBMISSION REQUIREMENTS

GitHub Repository Link

Public GitHub repository containing the complete source code.

Live Deployment Link

Your project must be live and accessible to the judges.

Short Project Description

A brief description of your project, features, and how to run it (README).

All deliverables must be submitted

Ensure all required links and documents are submitted before the deadline.

Important

Incomplete submissions or missing deliverables will not be evaluated.

07 FRONTEND CAPABILITIES (ALLOWED)

Participants may use the following client-side features:

Local Storage

Session Storage

IndexedDB

Browser APIs

Mock JSON Data

Client-side Routing

Client-side State Management

Static Assets & Resources

Important

All data must remain on the client side. No external databases, APIs, or backend services are allowed.

08 JUDGING PARAMETERS

Submissions will be evaluated based on the following parameters:

Product Thinking

How well your solution addresses the problem and user needs.

User Experience

Ease of use, flow, and overall user satisfaction.

Visual Design

UI aesthetics, layout, typography, and color harmony.

Functionality

Features work as described and meet requirements.

Code Quality

Clean, readable, maintainable and well-structured code.

Creativity

Originality of idea and uniqueness in implementation.

Performance

Speed, responsiveness, and overall efficiency of the application.

Data Visualization

Clarity, accuracy, and effectiveness of data representation.

09 DISQUALIFICATION GROUNDS

Participants will be disqualified for any of the following reasons:

Use of a disallowed framework/technology.

Use of a pre-built template as the project's starting point.

A submission that is substantially AI-generated as a whole, rather than AI-assisted.

Inability to explain your own submitted code when asked by a judge.

Missing any required submission deliverable before the deadline.

Note:

The decision of the organizers and judges will be final and binding in all matters.
